Dhruv Amit Shah

Mumbai, India | +91 8879823117 | shahdhruv19705@gmail.com | portfolio-gpt-tau.vercel.app | linkedin.com/in/dhruv-shah-670141282 | github.com/dhruv19705

Education

KJ Somaiya College of Engineering — Mumbai, India
B.Tech in Artificial Intelligence & Data Science, CGPA: 9.53 — *July 2024 – Present*

Manipal Institute of Technology — Manipal, India
B.Tech in CSE (AI & ML) – First Year, CGPA: 8.36 — *May 2023 – May 2024*

Experience

Summer Intern, Veefin — May 2026 – Present
Trade Finance & AI Systems — *Mumbai, India*

- Contributed to an AI-powered Recovery Intelligence microservice prioritising debtors via configurable business rules and risk insights within an enterprise Collection Management System.
- Integrated prompt engineering into QA workflows to generate AI-driven test scenarios and synthetic banking data, tripling test data creation speed. Worked with the QA team in retesting of bugs and understanding trade finance.
- Built Apache Camel–based ETL/integration workflows to orchestrate microservices and automate cross-system data exchange.
- Assisted in Developing an internal HR management platform streamlining employee workflows and data management across the organisation.

Research Assistant, EUCLID – Center for Sustainable & Secure Blockchain — Feb. 2025 – Oct 2025
Mumbai, India

- Co-authored a paper on vulnerability assessment of defacement attacks on healthcare websites, accepted at IEEE ICCCNT 2025 [Paper].

Machine Learning Intern, Suvidha Foundation — May 2025 – Jun. 2025
Mumbai, India

- Built a custom NLP/ML pipeline for news summarisation; benchmarked T5, BART via HuggingFace and curated datasets for fine-tuning.

AI/ML Intern, Ashna AI — Jun. 2025 – Aug. 2025
Mumbai, India

- Built a PDF-based Q&A system using NLP without external API dependencies; contributed to Ashna AI, an early Indian-origin LLM.

Projects

ChainBreak | *Python, Neo4j, Docker, Flask, MongoDB, Tor, React* — 2025

- Bitcoin forensics platform combining blockchain analytics with dark-web intelligence; custom graph algorithms detect wallet clusters, peel chains, and chain-hopping with real-time risk scoring. **4th place, CipherCop National Police Hackathon - First National Police Hackathon** (1000 teams).

Local Codebase RAG Assistant | *Python, FastAPI, React, FAISS, Sentence Transformers, Groq Llama 3.1* — 2025

- Full-stack RAG application enabling natural-language search over entire code repositories; parsed source into functions/classes, indexed semantic embeddings in FAISS, and generated context-aware responses with file/line-number citations, an interactive code viewer, and real-time streaming.

Stock & Mutual Fund Recommendation Engine | *yfinance, Financial Metrics* — 2025

- Built an automated scoring pipeline over live OHLC and fund data to rank equities and mutual funds by asset class and market cap, outputting confidence-scored recommendations.

Technical Skills

Languages: Python, C++, Java, Solidity, SQL
ML/AI: Scikit-Learn, TensorFlow, PyTorch, HuggingFace Transformers, LangChain, NLTK, SpaCy, RAG, FAISS, Sentence Transformers, LLM APIs (Groq, OpenAI)
Data & Viz: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Streamlit
Web & Tools: FastAPI, Flask, REST APIs, BeautifulSoup, Selenium, Docker, Neo4j, MongoDB, Postman, Burpsuite, Wireshark, Tableau, PowerBI, Git
Coursework: DSA, DBMS, Machine Learning, Deep Learning, NLP, ANN, Big Data Analytics, Agentic AI, Statistics & Probability, Cryptographic Algorithms

Certifications

Databases and SQL for Data Science with Python – IBM (Coursera) | Basics of Blockchain – SUNY Buffalo (Coursera) | Foundations of Cybersecurity – Google | Python for Data Science, AI & Development – IBM (Coursera)
