

Dhruv Amit Shah

Mumbai, India | +91 8879823117 | shahdhruv19705@gmail.com | www.linkedin.com/in/dhruv-shah-670141282 | github.com/dhruv19705

EDUCATION

KJ Somaiya College of Engineering (Currently in 3rd Year)

B.Tech in Artificial Intelligence & Data Science, CGPA: 9.5275

Vidyavihar, Mumbai

July 2024 – Present

Manipal Institute of Technology (First Year)

B.Tech in Computer Science & Engineering (AI & ML), CGPA: 8.36

Manipal, Karnataka

May 2023 – May 2024

JEE MAINS: 95.98 %ile, MHTCET: 98.62 %ile

EXPERIENCE

Summer Intern

May 2026 – Present

Veefin

Mumbai, India

- Validated end-to-end Trade Finance workflows by testing Import Letter of Credit (LC) lifecycles across Issuing Banks, Advising Banks, and Exporters, ensuring functional accuracy and regulatory compliance.
- Performed comprehensive UI, backend integration, and REST API testing using Postman, validating request/response payloads, status codes, business logic, error handling, multi-party data consistency, and Maker-Checker authorisation workflows.
- Collaborated with the QA team to integrate prompt engineering into testing workflows, enabling AI-generated test scenarios and synthetic test data across multiple banking modules, reducing manual effort and accelerating test data creation by 200%.
- Contributed to the design and development of an AI-powered Recovery Intelligence microservice that prioritised debtors using configurable business rules and risk insights, enabling more effective collection strategies within the enterprise Collection Management System (CMS).
- Assisted in building a Retrieval-Augmented Generation (RAG)-based RFP automation platform that ingested enterprise knowledge bases to generate context-aware responses, significantly reducing manual effort in RFP preparation.
- Assisted in developing Apache Camel-based ETL and integration workflows to orchestrate enterprise microservices, automate data exchange, and seamlessly integrate the AI-powered Recovery Intelligence microservice into the existing Collection Management System (CMS).

Research Assistant

Feb. 2025 – Oct. 2025

EUCLID - Center of Sustainable and Secure Blockchain Development

Mumbai, India

- Wrote a conference paper on Vulnerability Assessment and Impact Analysis of Defacement Attacks on Healthcare Websites, which got accepted in The 16th International IEEE Conference on Computing, Communication and Networking Technologies (ICCCNT) 2025 [Paper Link]
- Organised an internship drive and managed industry-student interaction booths, and also led the induction of multiple interns

Machine Learning Intern

May 2025 – Jun. 2025

Suvidha Foundation

Mumbai, India

- Developed a custom NLP and ML architecture for news summarisation, optimising for accuracy and efficiency.
- Analysed pre-trained models like T5, BART, etc., using HuggingFace and created high-quality datasets for model training and fine-tuning.

AI ML Intern

Jun. 2025 – Aug. 2025

Ashna AI

Mumbai, India

- Developed a website that accepts PDF inputs, extracts text, applies natural language processing (NLP) techniques, and generates a question-and-answer system without using API keys
- Understood and contributed in the working of Ashna AI - First Indian Origin LLM

Event Manager

2023 – 2024

Comedy Club Manipal

Manipal, Karnataka

- Managed a standup comedy event featuring comedian Pranit More

PROJECTS

- ChainBreak** | *Python, Neo4j, Docker, Flask, MongoDB, Tor, DarkWeb Crawler, React.js, Blockchain API* 2025
- ChainBreak is a comprehensive Bitcoin transaction tracking and analysis platform that combines blockchain analytics with darkweb intelligence to map pseudo-anonymized transaction graphs, successfully detecting wallet clusters and tracing illicit patterns like peel chains and chain-hopping. Implemented custom graph analysis algorithms to evaluate multi-party transaction flows, generating real-time risk scores.
- Bitcoin Transaction Classification Project** | *Python, Scikit-Learn, Random Forest, Pandas, Numpy* 2025
- Built a multi-class classification ensemble model achieving 98.69% accuracy in classifying transaction types (e.g., HYIP, Gambling)
- Gold Price Prediction using News Sentiment** | *Python, NLP, Logistic Regression, Linear Regression* 2025
- Developed a hybrid model combining classification (price direction) and regression (magnitude) using news sentiment features, achieving 86.72% accuracy
- Stock Fundamental Analysis & Long-Term Recommendation System** | *yfinance, Financial Metrics* 2025
- Engineered an automated data engine utilizing yfinance, mftool, and web scrapers to aggregate financial metrics and AUM; built a classification pipeline to categorize and rank mutual funds by asset class (Equity, Debt, Hybrid) and market cap (Large, Mid, Small-cap).
 - Developed a quantitative stock ranking system pulling live OHLC data via yfinance to evaluate core fundamentals, integrating a custom scoring algorithm that outputs automated long-term recommendations with calculated confidence scores.

TECHNICAL SKILLS

Languages: Python, C++, Java, C, Solidity, HTML, CSS, SQL, Prolog
Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Tkinter, Scikit-Learn, FastApi, BeautifulSoup, Selenium, Streamlit, Langchain, Plotly, TensorFlow, PyTorch, Flask, NLTK, SpaCy, Hugging Face Transformers
Tools: Postman, Tableau, Docker, n8n, Wireshark, Advanced Visualization in Excel, MS Office, Canva, GitHub, Git, Burpsuite, Jira, PowerBI
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management System, Statistics, Probability, Optimization, Cryptographic Algorithms, Hypothesis Testing, Artificial Intelligence, Computer Networks, Machine Learning, Natural Language Processing, Artificial Neural Networks, Deep Learning, Big Data Analytics, Agentic AI

HACKATHONS

- CipherCop-1st National Police Hackathon (4th Place)** | *ChainBreak-Blockchain Forensics Platform* 2025
- Developed **ChainBreak**, a blockchain forensics and anomaly detection platform tracing illicit crypto transactions.
 - Implemented dark web crawling, Neo4j graph analytics, and ML-based anomaly detection, detecting money laundering patterns through graph visualisation, risk scoring mechanism with OSINT tools along with confidence scores to identify false positives and to flag laundering tactics.

CERTIFICATIONS

Databases and SQL for Data Science with Python – IBM — Coursera
Basics of Blockchain – University at Buffalo & The State University of New York — Coursera
Foundations of Cybersecurity – Google
WorldQuant Brain Hackathon – Reached Gold Level
EDA and Data Visualization Course in Data Science – Scaler
Business Intelligence (BI) Essentials – IBM — Coursera
Python for Data Science, AI & Development – IBM — Coursera
